SUMMARY

Computer Science graduate with First Class Honours specializing in full-stack web and mobile application development. Skilled in building cross-platform applications (Flutter, React.js, Node.js) and integrating AI models. Brings a strong foundation in QA automation and CI/CD pipelines to ensure the delivery of scalable, secure, and production-ready software in Agile environments.

TECHNICAL SKILLS

- Languages:** JavaScript (ES6+), Dart, Python, HTML5, CSS3, Java, C++, SQL
- Frontend & Mobile:** React.js, Vite, Flutter, Tailwind CSS, Responsive Web Design
- Backend & Cloud:** Node.js, Express.js, RESTful APIs, PostgreSQL, Supabase, Microsoft Azure, Google Cloud Platform (GCP)
- Testing & CI/CD:** Git/GitHub, Bitbucket, Karate Framework, Cucumber BDD, Postman, CI/CD Integration
- AI Tools:** TensorFlow Lite, OpenAI API, ChatGPT, Gemini, Cursor

WORK EXPERIENCE

QA Automation Intern

Kuala Lumpur, Malaysia

Teleport Platforms Sdn. Bhd.

Oct 2025 – Apr 2026

- Partnered directly with software engineers in Agile sprints to integrate automated testing pipelines into GCP CI/CD, sustaining rapid release velocity and ensuring 100% production readiness.
- Engineered 50+ automated end-to-end regression test suites using Karate and Cucumber BDD, streamlining the software development lifecycle and reducing manual execution time by 83%.
- Executed deep RESTful API validations and system mapping via Postman and Swagger UI, successfully surfacing and resolving critical pre-production architecture defects.

KEY PROJECTS

BWR Services - Client Conversion Landing Page

Apr 2026 – May 2026

Core Technologies: React.js, Tailwind CSS, Vercel

- Engineered a responsive, high-performance business landing page utilizing React.js and Tailwind CSS, building reusable UI components for a seamless cross-viewport experience.
- Developed a frictionless booking architecture integrated directly with the WhatsApp API via custom deep links, eliminating manual inquiry processes to drive client conversion.

HeartCare: AI-Driven Cardiovascular Health Assistant

Mar 2025 – Feb 2026

Core Technologies: Flutter, Node.js, PostgreSQL (Supabase), TensorFlow Lite, RESTful APIs

- Engineered a full-stack health platform featuring an on-device TensorFlow Lite AI model trained on 70,000 data entries, achieving 90% cardiovascular risk prediction accuracy.
- Integrated third-party APIs (OpenAI, Google Maps, Firebase) with a Node.js/Supabase backend to deliver a feature-rich mobile assistant.
- Secured Gold Award (iDRIVE 2025) and Silver Awards (WINSTEM 2025, InnoGEN 2026); successfully registered intellectual property with MyIPO (CRLY2025M10255).

MYCare - Community Support Mobile App

Nov 2024 – Jan 2025

Core Technologies: Flutter, Python (Selenium, BeautifulSoup), Azure PostgreSQL, RESTful APIs

- Led a student Agile team to deliver a cross-platform mobile application, owning end-to-end system architecture decisions and API integration.
- Built automated Python ETL data pipelines to scrape, clean, and consolidate targeted datasets across 10+ external sources into an Azure PostgreSQL cloud database.

TourEase - Tourist Assistant Mobile App

Jul 2024 – Nov 2024

Core Technologies: Flutter, Python, Azure PostgreSQL, Postman, RESTful APIs

- Wrote Python scripts for API testing to ensure data retrieval accuracy and operational cost efficiency while developing core Flutter application features.
- Awarded 1st Place in the Digital Creative Marathon (DICRATHON) at UPSI, delivering a zero-defect travel assistant supporting Malaysian tourism and local SMEs.

LEADERSHIP & INVOLVEMENT

CODE FOR INNOVATION Hackathon (C++, 24 Hours)

Apr 2025

- Demonstrated rapid problem-solving and cross-functional teamwork under extreme pressure by successfully troubleshooting critical architecture failures and rebuilding a backend system from scratch in under 12 hours, resulting in 2nd place.

Micro:bit UTeM Program Facilitator & Mentor

May 2024 – Nov 2024

- Conducted on-site Micro:bit training and mentoring 20 primary school students in block-based programming through interactive lessons and hands-on activities, with 85% of students successfully completing all assigned tasks.
- Facilitated Micro:bit workshops for 12 secondary school students at UTeM, guiding them through coding fundamentals and serving as a judge to evaluate their solutions for 3 custom-designed real-world problem scenarios.
- Guided student groups through hands-on hardware-software integrations, earning a Bronze Award for creative technical execution in the project exhibition phase.

EDUCATION

Universiti Teknikal Malaysia Melaka (UTeM)

Melaka, Malaysia

Bachelor of Computer Science in Software Development (Hons.)

Oct 2022 – Apr 2026

CGPA: 3.88 | Yayasan Bank Rakyat Scholar | First Class Honours | Dean's List Awardee (All Semesters)
